

License Manager Charts

The initial view of the charts and reports module includes six tabbed focus areas. The fifth of these is the **License Manager Charts** area.

The screenshot shows the 'License Manager Charts' tab selected among others like 'GSM Performance Charts', 'AGS Performance Charts', 'AGS Usage Reports', 'SDE Usage Reports', and 'License Manager Reports'. Below the tabs, there are input fields for 'From:' (07/14/2018) and 'To:' (08/14/2018). A 'Vendor : Manager' dropdown is set to 'ACAD : VESHQCVS', and a 'License Type' dropdown is set to '85812IDSP_F'. A blue 'Create' button is located below these fields.

The **Vendor : Manger** box should contain a list of license vendors and their associated license manager server names. Selecting an option here will populate the **License Type** dropdown with a list of options related to that vendor's license structure.

Choose a **License Type** along with a **From** and **To** date range, and then press the **Create** button to load the chart on the page below the selection options.

The chart output may be interacted with dynamically. Hover the mouse over lines to view more detailed information at that point in time. Drag the blue slider in the bottom right to adjust the chart's time extent. The buttons to the upper left of the chart will zoom the time extent to convenient preset intervals.

The menu button in the upper right of the chart supports additional actions such as exporting the chart to a variety of formats.
