

Installation Overview

After downloading GeoSystems Monitor Enterprise:

1. [Installing Python 2.7.9](#) (for GeoSystems Monitor versions 4.2.0 and below, if not already installed on your system).
2. [Installing GeoSystems Monitor for Enterprise](#) (for GeoSystems Monitor version 4.2.1 and above Python is included in the install).

NOTE:

After completing the installation, please refer to [Getting Started - Logging In](#) for important first steps in configuring the application.
