

# WMS Services

By default the monitoring check for a WMS service will test the first three layers and evaluate them to make sure they are returning a non-white image.

If this default does not give you the desired results, you can open the point and choose the layer to monitor in the drop down list (see image below). Note, that only the layers that are visible will display in the drop down list.

Name	Active	Status	Error	Last Check Time
Natural_Resources - CDEC Stations	Yes	Up	FtrCnt:2241	6/9/2016 4:41:45 PM
Land_Ownership - State Game Refuges	Yes	Up	FtrCnt:40	6/9/2016 4:41:45 PM
Testing More Data Sources	Yes	Up	LyrCnt:3	6/9/2016 4:39:30 PM
Basemap - Topographic	Yes	Up	N/A	6/9/2016 4:39:31 PM
US_Active_Mines	Yes	Up	N/A	6/9/2016 4:39:31 PM

**US\_Active\_Mines : WMS**
