Next

Once you have chosen to add an ArcGIS Portal webmap container, you will be presented with the following dialog.

Add a New PORTAL Monitoring Container

Select Connection

OR

Use PORTAL Credentials

Username

kduaway_ves

Password

.....

Type

PORTAL

URL

Example

https://portalURL/arcgis

Save As Connection

Previous

Next

Next

An ArcGIS Portal container can be added in 2 different ways.

1. You can use the left side dropdown to select a connection. See [Connections](#) for more information.

2. You can provide an ArcGIS Portal username and password, along with the URL.

After you have either provided a connection, or ArcGIS Portal credentials, clicking the corresponding [**Next**] button will continue to the next window.

The GeoSystems Monitor will take the information provided and generate a list of groups the ArcGIS Online user has access to.

Add a New Monitoring Container

Select group from:
VESTRA Resources, Inc

GeoSystems Monitor Testing

Citrus
GeoSystems Monitor Testing
Medford MLI Web Map Group
Mt. View Conflict of Interest Test (C
TrinColInvestment
VFD_Co_71

Search Public

Search Organization

Previous

Next

Select a group or search Public/Organization and click the [**Next**] button.

Add a New AGOL Monitoring Container

Select a Web Map

Search

	BLM_AGOL_1	Select
	BLM_AGOL_2	Select
	BLM_AGOL_3	Select
	BLM_AGOL_4	Select
	CIPS_AGS_BASE_TEST	Select
	CIPS_AGS_HeatMap_ImageService	Select
	CIPS_AGS_LS_FACTOR_TEST	Select

Previous

You will then see another panel which reveals all the web maps in the selected location, similar to the one shown to the right.

Click on the [Select] button next to the web map you'd like to create a container for.

Add a New Monitoring Container

Name	Type
Soils_AGOL_1	Web Map - Master
Basemap - Topographic	Map Service
Wettest Drainage Class (soil hydrology map operational layer)	Map Service
Report content on Climate Change	Map Service
Length of Growing Period	Tiled Map Service
Soils of Canada - Orders (tiles)	Tiled Map Service
Failed Season	Tiled Map Service

Previous

Create Container

This will bring up the next panel where all of the layers for the web map selected will be shown.

Although this step usually completes quickly, it's best to wait for a few seconds to make sure the process is completed.

Once completed, click the [Create Container] button to create your monitoring container.

At this point a new container will appear on the dashboard, with a spinning icon indicating it's in the process of setting up the individual monitoring points.

When it's completed setting up the individual monitoring points, the spinning icon turns into a check mark, and the monitoring container can be opened (by clicking on [Status Points]) to reveal the points inside (see image below).

						All 7 Slow 0 Down 0 Inactive 0		
Name	Type	Active	Status	Info	Last Check Time			
Soils_AGOL_1	Web Map	Yes	Up	LyrCnt:5	6/1/2017 12:01:26 PM			
Basemap - Topographic	Map Service	Yes	Up	N/A	6/1/2017 11:51:22 AM			
Failed Season	Tiled Map Service	Yes	Up	N/A	6/1/2017 11:51:22 AM			
Length of Growing Period	Tiled Map Service	Yes	Up	N/A	6/1/2017 11:51:22 AM			
Report content on Climate Change	Map Service	Yes	Up	N/A	6/1/2017 12:03:28 PM			
Soils of Canada - Orders (tiles)	Tiled Map Service	Yes	Up	N/A	6/1/2017 11:51:21 AM			

This completes the process of creating a container of monitoring points for a web map, which can now be moved (drag & drop) to a preferred location or moved to another tab.
