

License Manager Reports

The initial view of the charts and reports module includes six tabbed focus areas. The sixth of these is the **License Manager Reports** area.

The screenshot shows the 'License Manager Reports' tab selected in a navigation bar. The interface is divided into a left sidebar and a main content area. The sidebar contains the following controls:

- From:** A date input field set to '07/14/2018' with a calendar icon.
- To:** A date input field set to '08/14/2018' with a calendar icon.
- Report Templates:** A dropdown menu currently showing 'Detailed User'.
- Username:** A dropdown menu currently showing 'ADMINISTRATOR'.
- Orientation:** A dropdown menu currently showing 'Portrait'.
- Font Size:** A dropdown menu currently showing '10'.
- Create:** A blue button at the bottom of the sidebar.

The main content area on the right is currently empty, representing the report output.

First, choose a **Report Template**. Presently, there are two report templates to choose from.

- **Detailed User** - (need content)
- **User Summary** - (need content)

If running a **Detailed User** report, then use the next dropdown box to choose the **Username** to report on.

If running a **User Summary** report, then use the next dropdown box to choose a **Vendor : Manger** license server to report on.

The **Orientation** option allows the standard **Portrait** or **Landscape**. For most cases, the default portrait orientation will suffice. Use landscape orientation in cases where vendor, manager, or computer names are very long.

The **Font Size** option is also present to assist with cases of very long names. If you find your service names being truncated by an ellipsis '...', then try lowering the font size.

A note on the report PDF output:

In **Chrome** and **Firefox**, the report should be generated in the pane to the right of the options.

In **Internet Explorer**, the report should behave as a download, and will need to be opened in an external PDF viewer.

Select a **From** and **To** date in addition to the inputs above, and press the **Create** button to load the report.

The image below is an example output in Chrome.
