Monitor Description

Server Name

Service Name

Create Monitor Point

The IMS™ Service monitoring point performs three (3) checks at once. The first check makes sure the Esri is active. The second check makes sure the ArcIMS™ catalog contains the service, and the third check confirms the service is active.

The parameters that are unique to the IMS™ Service include:

Server Name	DNS name of server where IMS service is located
Service Name	IMS service name, casEsenSiTive
