

License Manager Charts

The initial view of the charts and reports module includes seven tabbed focus areas. The sixth of these is the **License Manager Charts** area.

Create

The **Vendor : Manager** box should contain a list of license vendors and their associated license manager server names. Selecting an option here will populate the **License Type** dropdown with a list of options related to that vendor's license structure.

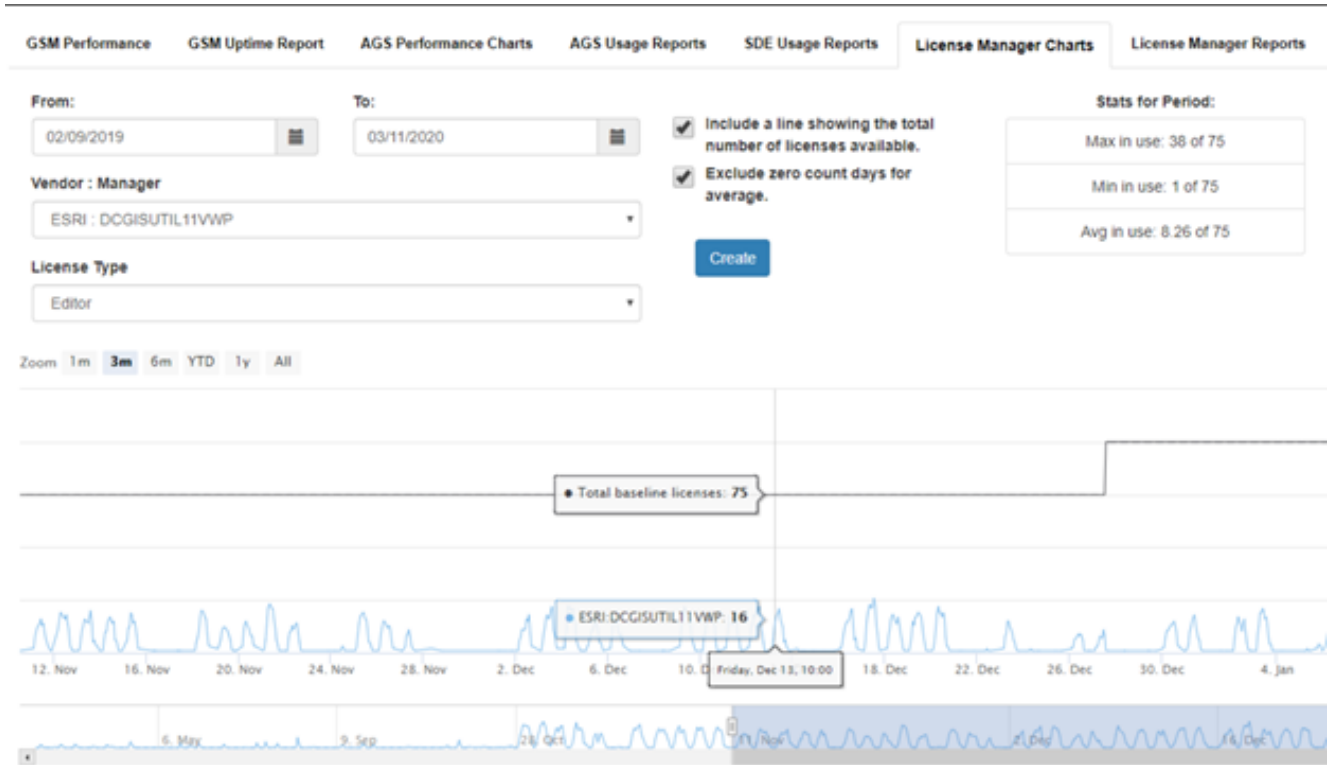

Choose a **License Type** along with a **From** and **To** date range, and then press the **Create** button to load the chart on the page below the selection options.

Check the **Include Line showing total number of license available** box for a second line of total licenses.

Check the **Exclude zero count days for average** box to have zero count days not included in the calculation for average licenses used over the selected time frame.

The chart output may be interacted with dynamically. Hover the mouse over lines to view more detailed information at that point in time. Drag the blue slider in the bottom right to adjust the chart's time extent. The buttons to the upper left of the chart will zoom the time extent to convenient preset intervals.

The menu button in the upper right of the chart supports additional actions such as exporting the chart to a variety of formats.
