

# License Manager Reports

The initial view of the charts and reports module includes seven tabbed focus areas. The seventh of these is the **License Manager Reports** area.

The screenshot shows a web application interface for 'License Manager Reports'. At the top, there is a horizontal tab bar with seven tabs: 'GSM Performance Charts', 'GSM Uptime Report', 'AGS Performance Charts', 'AGS Usage Reports', 'SDE Usage Reports', 'License Manager Charts', and 'License Manager Reports'. The 'License Manager Reports' tab is currently selected. On the left side, there is a sidebar containing several filter sections: 'From:' with a date input set to '01/27/2020'; 'To:' with a date input set to '02/27/2020'; 'Report Templates' with a dropdown menu showing 'User Summary'; 'Vendor : Manager' with a dropdown menu showing 'ESRI : CNT-CHARCSRV105'; 'Orientation' with a dropdown menu showing 'Portrait'; and 'Font Size' with a dropdown menu showing '10'. At the bottom of the sidebar is a blue 'Create' button. The main area of the interface is a large, empty white rectangle, representing the report output.

First, choose a **Report Template**. Presently, there are two report templates to choose from.

- **Detailed User**
- **User Summary**

If running a **Detailed User** report, then use the next dropdown box to choose the **Username** to report on.

If running a **User Summary** report, then use the next dropdown box to choose a **Vendor : Manager** license server to report on.

The **Orientation** option allows the standard **Portrait** or **Landscape**. For most cases, the default portrait orientation will suffice. Use landscape orientation in cases where vendor, manager, or computer names are very long.

The **Font Size** option is also present to assist with cases of very long names. If you find your service names being truncated by an ellipsis '...', then try lowering the font size.

**Note:** If you are on version 4.2.0 you will now see the option to export to a CSV file. Selection box is located right below the font size dropdown box.

Select a **From** and **To** date in addition to the inputs above, and press the **Create** button to load the report.

The image below is an example output in Google Chrome.

GSM Performance Charts
GSM Uptime Report
AGS Performance Charts
AGS Usage Reports
SDE Usage Reports
