The **<u>Oracle SDE List Tables</u>** monitoring point is designed to work together with the **<u>Oracle SDE Usage</u>** or Usage reporting for data in an Oracle RDBMS. It is recommended that these two checks be placed together are needed to generate the data required to support SDE Usage reporting.

The Oracle SDE List Tables check runs once a week based on a time stamp stored in the GeoMonitor databes 10.0 and greater) geodabase feature datasets, feature classes and tables in an Oracle SDE instance. This lifeature classes and that are unused for SDE Usage reporting. The Oracle SDE Usage check is generally runclasses and tables are open. A more detailed description of the <u>Oracle SDE Usage check</u> is provided in a la

Note: If you are using Microsoft SQL Server / SQL Server Express, follow the instructions in Setting Up M

If you are not sure where your Usage information is being stored, you can consult the "About" dialog on th

This check needs an Oracle (32Bit) client that customer provides which is installed locally and configured to ORACLE_HOME environment variable is set and that the system PATH is set to the folder where the Oracle Oracle (32Bit) client that customer provides which is installed locally and configured to oracle (32Bit) client that customer provides which is installed locally and configured to oracle (32Bit) client that customer provides which is installed locally and configured to oracle (32Bit) client that customer provides which is installed locally and configured to oracle (32Bit) client that customer provides which is installed locally and configured to oracle (32Bit) client that customer provides which is installed locally and configured to oracle (32Bit) client that the system PATH is set to the folder where the Oracle (32Bit) client that the system PATH is set to the folder where the Oracle (32Bit) client that the system PATH is set to the folder where the Oracle (32Bit) client that the system PATH is set to the folder where the Oracle (32Bit) client that the system PATH is set to the folder where the Oracle (32Bit) client that the system PATH is set to the folder where the Oracle (32Bit) client that the system PATH is set to the folder where the Oracle (32Bit) client that the system PATH is set to the folder where the Oracle (32Bit) client that the system PATH is set to the folder where the Oracle (32Bit) client that the system PATH is set to the folder where the Oracle (32Bit) client that the system PATH is set to the folder where the Oracle (32Bit) client that the system PATH is set to the folder where the Oracle (32Bit) client that the system PATH is set to the folder where the Oracle (32Bit) client that the system PATH is set to the folder where the Oracle (32Bit) client that the system PATH is set to the folder where the Oracle (32Bit) client that the system PATH is set to the folder where the Oracle (32Bit) client that the system PATH is set to the folder where the Oracle (32Bit) client that the syst

Note: If you are using Microsoft SQL Server / SQL Server Express, follow the instructions in Setting Up M

The parameters that are unique to the Oracle SDE List Tables include:

Server Name	Domain name of Server (or IP address)
Server Nm w/Listener	Server name, port and listener to connect to the Oracle DB
	Example: voracle10g:1521/vector (Must be identical for this check and I
userID	Oracle user ID with access to the Oracle Table
	Note: userID should be entered as encrypted information
userPW	Oracle user PW for access to the Oracle Table
	Note: userPW should be entered as encrypted information
Rpt-DSN:User:Pwd	Needed only if using RDBMS to store usage information – string must include
-	YourODBC ConnectionName:UserID:UserPW
	_
	Note: Rpt-DSN:User:Pwd should be entered as encrypted information
Opt-User Schema	Defaults to SDE. Enter User Schema if needed. Compatible with 12c pluggab
